HP 17bII+ Setting appointments

Appointments on the HP 17bII+

Practice setting appointments

Alarms on the HP 17bII+

The HP 17bII+ has a built-in clock that can be used to set alarms, called appointments. These abilities are accessible by pressing the menu label and then pressing as shown in figures 1 and 2 below. The HP 17bII+ then displays the set of menu labels for appointments as shown in figure 3.

Figure 1

Figure 2

Figure 3

The HP 17bII+ handles up to 10 different appointments – 5 on the first screen shown in figure 3 above, 5 on the next screen displayed after pressing and shown in figure 4 below.

Figure 4

Each appointment needs a date and time. An appointment can display message and you can set appointments to repeat at a desired interval. If you need your HP 17bII+ to beep and remind you to wake up every morning at 7 A.M., you can. The practice examples will show how you can use alarms to make your HP 17bII+ even more useful.

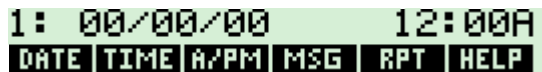

Figure 5

Practice setting alarms

Example 1: Set an appointment to display the message “HP IS GREAT” every morning for one week at 8 A.M. The example will assume the date of the first alarm is January 8, 2008 and will use appointment 2. To enter spaces, press a blank menu key as shown below.

Solution:

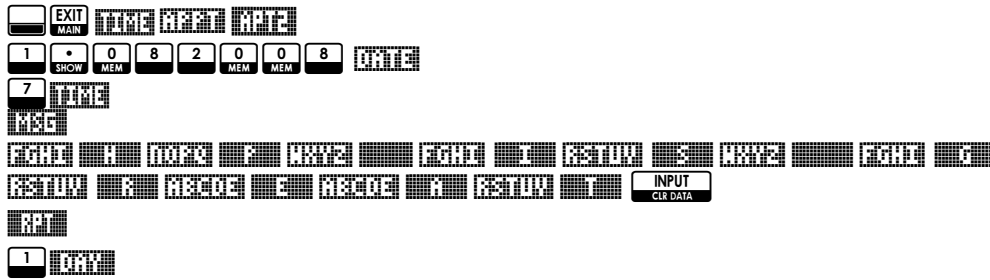

Figure 6

Figure 7

Figure 8

Answer: Appointment 2 is now set.

Example 2: Clear appointment 2 just set.

Solution: The image shows a close-up of the calculator keypad, specifically the 'INPUT CLR DATA' button.
