RS-32
Hand Controller

The Olympus RS-32 Hand controller is made for more than just transcription. Packed with advanced features, this multi-function device gives transcriptionists and Professional Dictation System user's hands-on control over their files. The Hand Controller can be used for comfortable transcription at a work-desk or removed from its ergonomically designed wrist rest for mobile use. The practical design allows for users to easily locate button's without the need to look, increasing the efficiency for non-footswitch transcribers. Functionality is further increased by using the Hand Controller as a connected remote to control a voice recorder from a distance.

Product features

- Ergonomic design fits most standard keyboards and notebooks

- Soft pads on wrist rest and natural hand positioning — comfortable enough for all day use

- Non-slip mats on its base ensures the device stays in place, even under heavy use

- Detachable wrist rest for flexibility and mobile use

- Button actions are individually configurable via software (ODMS)

- Extra long and durable USB cable

- Remote recording function

- Dictation playback control of recordings when connected to a docking station
