VNseries
VN-541PC

WMA	Mono Rec	4GB	PC connection	AAA ×2	One-touch recording	Intelligent Auto Mode
Lowcut Filter	Noise Cancel	Playback Speed Control	Index function	Scene Select	Low Power Consumption	

Easy and simple recorder for everyday use. Ideal for students with smart functionality, intuitive operations, and one-touch recording.

Product features

Recording Scene Select – No need for detailed settings
Capture high-quality recordings with ease by selecting one of four scenes ideal for your environment. There is no need for detailed setting configuration, as the recording scene automatically applies the best recording settings. Switch between recording scenes effortlessly with the press of a single button. Choose from Memo, Talk, Music or LP (Long Play) and the recorder will handle the rest.
Memo

Music

Talk

LP Long Play

One-Touch Recording – Never miss a recording opportunity
One-Touch Recording allows users to power on and record in one motion. Simply slide up the REC switch and the voice recorder instantly starts recording even when the power is off. When recording is live the notification LED lights up and stays on until recording stops, so you can always tell when the VN-541PC is recording.

Noise Cancellation – For clear playback quality
The Noise Cancellation function powerfully reduces unwanted ambient noise and low-frequency sounds such as air-conditioner or projector fan noise for clear playback quality. This function is very effective in reducing surrounding distractions. To activate this feature press and hold the Noise Cancel button while the recorder is stopped, or during file playback.

Recording Scene Folders & PC Link help navigate your files
Time spent searching for recorded files is now reduced as the VN-541PC conveniently sorts recorded files into Recording Scene Folders. This means that you can easily search for and playback based on the recording scene of the file. By connecting the recorder to the PC using the bundled USB cable, you can also navigate the Recording Scene Folders to locate files on your PC screen.
